Heike Gursch
IMS MaxDB/liveCache Development Support
2015

News - General Remarks

- Some functionality might have been changed or expanded over the years.
 - Recommendations might have changed.
- ➔ For each expert session an update with the most important changes is published.
- Check the additional remarks after having heard or read the expert session.
 - Feedback to the responsible author is welcome if you recognize outdated information within the session.

Agenda

1. DBACockpit with other appearance
2. Different software directory structure

DBACockpit

- Be aware that this is one of our oldest expert sessions, from November 2009.
- Even if the general descriptions on how MaxDB and liveCache are embedded into CCMS still apply the appearance has changed significantly.
- At the end of the presentation you find an outlook to DBACockpit which is used in the current versions.
- The menu items on the left side have been reordered and extended. They are ordered in a more convenient way and if you are looking for something it mostly should be self-explaining where to find it.
- Also the location of diagnosis files has changed.

DBACockpit - Appearance

The screenshot displays the SAP DBACockpit 'Attributes' page for system WB9. The interface includes a navigation tree on the left and a main content area with several sections:

- Status:**

Name of Database Connection	WB9	Version	7.9.08.28
Operational State	CC	Online Since	04.03.2015 09:33:03
Standard Database User	SAPWB9	SQL access is possible	Yes
DBM Operator	CONTROL	DBM access is possible	Yes
- Used Area:**

Data Log Sessions
- Attributes:**

Database Name	WB9
Database Server	ku252059a
Description	
Database Version	Kernel 7.9.08 Build 028-123-252-258
Operating System	Linux 2.6.32.12-0.7-default #1 SMP 2010-05-20 11:14:20 +0200
Addressing	64 Bit
InstallationPath	/sapdb/WB9/db
GlobalPrograms	/sapdb/programs
GlobalData	/sapdb/data
PrivateData	/sapdb/WB9/data
Rundirectory	/sapdb/WB9/data/wrk/WB9
- Settings:**

Automatic Log Backup	ON	Command Monitor	OFF
Database Analyzer	OFF	Resource Monitor	ON
Snapshot exists	No	Database Trace	OFF

Different software directory structure

- Refers to page 15 “SAP MaxDB and liveCache Directory Structure” of the original expert session
- The described directories are only valid up to version 7.7; as of 7.8 the isolated installation has been introduced.
- Find more information about isolated installations in expert session 8 about new MaxDB features in 7.8.

Thank you
