SAP® MaxDB™: Introduction into Remote SQL Server  
News 2015

Public

The SAP logo is located in the bottom left corner of the slide. It consists of the letters 'SAP' in a white, bold, sans-serif font, set against a blue rectangular background.

# SAP® MaxDB™ Expert Session

Introduction into SAP ® MaxDB™ Remote SQL server

Heike Gursch  
Christiane Hienger  
IMS MaxDB/liveCache Development Support  
2015

## News - General Remarks

---

- Some functionality might have been changed or expanded over the years.
  - Recommendations might have changed.
- ➔ For each expert session an update with the most important changes is published.
- Check the additional remarks after having heard or read the expert session.
  - Feedback to the responsible author is welcome if you recognize outdated information within the session.

# Agenda

1. Global Listener – Upgrade of SAP MaxDB Software

## Global Listener – Upgrade of SAP MaxDB Software

---

- During a software update of a database in the isolated installation, only the database-specific `x_server` of this database is stopped;
- Neither the other database-specific `x_servers` nor the global listener have to be stopped.
- This means that the software of the global listener, even if it is stopped, is not implicitly upgraded to a new version when there is a software update.
- Usually, you do not have to upgrade the software of the global listener to a newer version.
- If an update of the global listener is required in exceptional cases, this must be specified explicitly for SDBUPD. You find the description in **SAP note 2127134**.

# Thank you
